SITUATION SUMMARY

Governor Brown Expedites Wildfire Recovery in Trinity, Lake Counties

Governor Edmund G. Brown Jr. today issued an emergency order for Lake and Trinity counties to help residents and businesses recover from the damaging effects of wildfires. Already this year, a series of wildfires in those counties has burned tens of thousands of acres, destroyed dozens homes and damaged critical infrastructure.

This executive order will expedite the removal of hazardous debris from the impacted areas and will waive fees to replace documents such as driver's licenses and birth certificates for those affected by the fires. Today's executive order follows the State of Emergency declaration issued in late July for wildfires across California during one of the hottest and driest summers on record.

The Executive Order can be viewed by selecting the blow link.

WEATHER

WEATHER SYNOPSIS BY REGION:

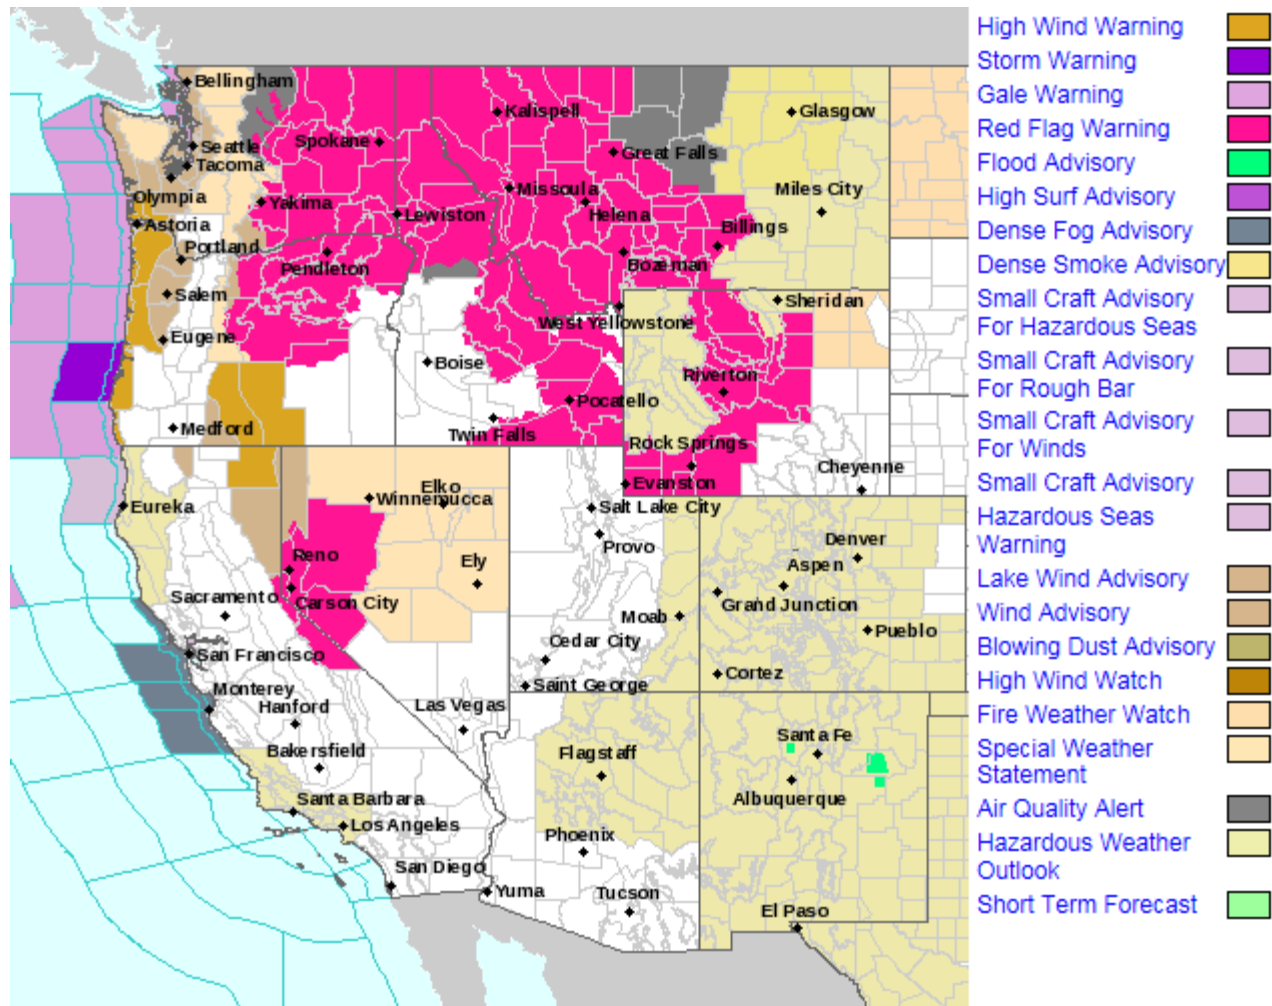

NORTHERN CALIFORNIA

Cloudiness over Northern California today ahead of a somewhat moist low pressure system that will move ashore later tonight. Wetting rain is expected to develop in the northwest areas around midnight into Saturday morning, mainly over the northwest mountains and north of Cape Mendocino. Light amounts of rain may reach into the Bay Area as well. As the system moves eastward Saturday, there will probably be some light morning rain across the northern inland areas and a few light showers in the eastern areas in the afternoon. All areas will generally see higher relative humidity values whether they receive rain or not. Moderately strong, gusty, south to southwest winds will develop today and last into Saturday. Wind gusts will mostly be 25-35 mph, but periods of gusts around 40-50 mph may develop over the higher terrain. The winds should decrease markedly Saturday evening. Mostly sunny to partly cloudy skies are expected Sunday. Temperatures will be much cooler over the weekend with afternoon highs in the mid 80s for the warmest inland valleys, which is about 10 degrees cooler than seasonal norms. Monday a weaker trough will linger over the region with dry and warmer weather. Another system will drop south Tuesday and Wednesday to cool things down again. Areas near and downwind of the fires are soon expected to have better dispersion conditions and/or less smoke production over the next few days. Smoky conditions are expected to decrease markedly for many areas over the weekend.

SOUTHERN CALIFORNIA

There will be little change in the weather today as strong high pressure remains situated over the Desert Southwest. Maximum temperatures will be in the 80s to low 90s across the mountains, with mid 90s to 105 in the valleys. Minimum relative humidity will be mainly between 12% and 25% away from the immediate coast. Some residual monsoonal moisture will bring isolated showers and thunderstorms to the desert areas near the Colorado River this afternoon. A Pacific trough dropping down the West Coast will bring a significant cooling trend to the region Saturday through the end of next week. Temperatures will cool to near normal by Sunday. The marine layer will deepen this weekend, with areas of morning low clouds and fog making it over the coastal areas Saturday and over most coastal valley locations by Sunday. The marine layer will be deep next week, with low clouds and fog making it over the lower coastal mountain slopes each morning. Westerly winds of 15 to 25 mph with gusts to 40 mph will surface across the desert slopes Saturday afternoon through the end of next week. These winds will also surface across Mono County Saturday afternoon.
